2 Qualification information

2.1 Qualification aim and design

The aim of this qualification is to recognise learners' achievements within the customer service environment. It is also for learners whose job role requires them to deliver continually improving service to customers. These learners may be in roles that carry a customer service specific job title, or their primary responsibility is to deliver excellent service to customers.

This qualification can also be used by learners who may not regard customer service as their primary responsibility, but recognise that customer service competencies are essential to complement their technical skills.

This qualification also serves as a core component of the Level 2 Intermediate Apprenticeship in Customer Service.

2.2 Progression opportunities

On completion of the Level 2 Diploma in Customer Service (RQF), learners may progress into employment or onto the following Skillsfirst qualifications:

- Level 3 Diploma in Customer Service (RQF)

or similar higher level qualifications.

3 Qualification structure

To be awarded the VTCT (Skillsfirst) Level 2 Diploma in Customer Service (RQF) learners must achieve all mandatory units. All **45** credits must be achieved.

- All **19** credits must be achieved from the mandatory Group M.
- A minimum of **3** credits must be achieved from Group A
- A minimum of **16** credits must be achieved from Group B
- A maximum of **7** credits can be achieved from Group C

The minimum TQT required to achieve this qualification is **450**.

4 Centre requirements

4.1 Resources

Centres must possess the physical resources needed to support the delivery of the programme and the assessment of knowledge and skills, which should therefore be of industry standard. Where specific resources are required these have been indicated in individual units.

4.2 Instructus Skills

The Level 2 Diploma in Customer Service (RQF) is based on the units developed by Instructus Skills who are the sector skills council for customer service. Their contact details are:

Instructus Skills
Unit 3, Cherry Hall Road
North Kettering Business Park
Kettering, Northants
NN14 1UE
Tel: 01536 738631

info@instructus.org

This handbook provides details from e-skills assessment strategy, which centres will need to apply in order to assess and quality assure the Level 2 Diploma in Customer Service (RQF) and includes the:

- requirements of those who assess performance, and moderate and verify assessments
- continuous professional development
- summary of assessment methods

The complete assessment strategy is available for view and to download from the e-skills website <https://www.instructus-skills.org/>

4.3 Requirements of those who assess performance, and moderate and verify assessments

4.3.1 Assessors

The primary responsibility of an assessor is to assess learners' performance in a range of tasks and to ensure the evidence for the competence of knowledge based skills submitted by the candidate meets the requirements of the assessment criteria. It is important that an assessor can recognise occupational competence as specified by the national standard. Assessors therefore need to have a thorough understanding of assessment and quality assurance practices, as well as have in depth technical understanding related to the qualifications for which they are assessing learners. It will be the responsibility of the approved centre to select and appoint assessors.

Assessors should:

- hold (or be working towards) an appropriate qualification, as specified by the appropriate regulatory authority, confirming their competence to assess learners undertaking competence based units and qualifications. Assessors working towards an appropriate qualification must get their decisions countersigned by a suitably qualified assessor/verifier. Assessors holding older qualifications must be able to demonstrate that they are assessing to the current standards;

- be “occupationally competent” or have the necessary and sufficient experience of the role for which they intend to undertake assessments, including the level and scope of individual candidate performance at work or in RWEs; and judgements about the quality of assessment and the assessment process.

4.3.2 Internal quality assurer (IQA/IV)

A primary responsibility of an IQA/IV is to assure the quality and consistency of assessments by the assessors for whom they are responsible. IQA/IV s therefore need to have a thorough understanding of quality assurance and assessment practices, as well as sufficient technical understanding related to the qualifications that they are internally verifying. It will be the responsibility of the approved centre to select and appoint IQA/IVs

Potential IQA/IVs should:

- hold (or be working towards) an appropriate qualification, as specified by the appropriate regulatory authority, confirming their competence to internally verify competence based assessments and learners. If an IQA/IV is working towards an appropriate qualification, their decisions must be countersigned by a suitably qualified IQA . IQAs holding older qualifications must be able to demonstrate that they are verifying to the current standards.
- be “occupationally competent or have the necessary and sufficient experience of the role for which they intend to verify assessments. This experience will provide potential verifiers with detailed knowledge of the functions described by the occupational standards that comprise the qualification and will also allow them to make judgements about the quality of assessment and the assessment process.

4.4 Employer direct model

Instructus Skills encourages the use of an employer direct model. The employer direct model is where colleagues, supervisors and/or managers in the workplace are involved in the assessment process.

In order to use this employer direct model:

An organisation must:

- have achieved or be in the process of achieving the appropriate regulatory body approved unit qualifications for assessment, moderation or verification; OR
- seek guidance and approval from an awarding organisation to demonstrate that they have:
 - appropriate processes in place to facilitate assessment, moderation or verification functions
 - carried out 100% mapping of the trainer, supervisor or managers assessment, moderation or verification skills and knowledge to the National Occupational Standards upon which the qualifications above are based.
- agree the mapping process with the awarding organisation/body involved
- demonstrate an equivalent level of rigour and robustness as the achievement of the unit qualification

Skillsfirst will:

- offer this model to employers only and
- supply information on the requirements for internal and external moderation/verification activities to assessment centres

4.5 Continuous professional development (CPD)

Centres are responsible for ensuring that assessors and IVs plan and maintain their CPD.

Centres are expected to support their assessors and IVs in ensuring that their knowledge remains current of the occupational area and of best practice in delivery, mentoring, training, assessment and verification, and that it takes account of any national or legislative developments.

Centres may have generic criteria and personnel specifications in addition to the above.

4.6 Total Qualification Time (TQT)

Each qualification has a Total Qualification Time (TQT) value based on the total number of hours learning required to achieve it. The TQT value reflects the number of supervised learning hours required to achieve the knowledge and assessment requirements, plus the length of time a learner would need to take to achieve the skills and capabilities to be deemed competent. All RQF qualifications are subject to an evaluation process to determine their fitness-for-purpose.

5 Assessment

5.1 Summary of assessment methods

For this qualification, learners will be required to provide a portfolio of evidence for **each** unit.

5.2 Evidence from workplace performance

- Evidence of occupational competence of all units at any level should be generated and collected through performance under workplace conditions. This includes competence units which have knowledge learning outcomes and assessment criteria.
- These conditions would be those typical to the candidate's normal place of work. The evidence collected under these conditions should also be as naturally occurring as possible. It is accepted that not all employees have identical workplace conditions and therefore there cannot be assessment conditions that are identical for all learners. However, assessors must ensure that, as far as possible, the conditions for assessment should be those under which the candidate usually works.

5.3 Characteristics of assessment guidance

The learner may produce evidence from a range of examples which should be recorded in some form. A record of evidence will confirm to the assessor their confidence in the learner's breadth and depth of knowledge and understanding in being able to competently meet the functional requirements of all the units.

The assessor will need to be assured that the learner can:

- meet all the learning outcomes of a unit
- pass all the assessment criteria of a unit

An assessor may request additional evidence if they are not satisfied with the evidence presented by the learner. If this occurs, it may need to be agreed in partnership with the learner and the assessor.

5.3.1 Professional discussion

Professional discussion is encouraged as a supplementary form of evidence to confirm a learner's competence. Such discussions should not be based on a prescribed list of questions but be a structured discussion which enables the assessor to gather relevant evidence to ensure the learner has a firm understanding of the standard being assessed

5.3.2 Realistic working environment (RWE)

It is essential that organisations wishing to operate a RWE operate in an environment which reflects a real work setting. This will ensure that any competence achieved in this way will be sustained in real employment. To undertake the assessment in a RWE the following guidelines must be met:

- the RWE is managed as a real work situation;
- assessment must be carried out under realistic business pressures;
- all services that are carried out should be completed in a way, and to a timescale, that is acceptable in business organisations;
- learners must be expected to achieve a volume of work comparable to normal business practices;
- the range of services, products, tools, materials and equipment that the learners use must be up to date and available;
- account must be taken of any legislation or regulations in relation to the type of work that is being carried out;

- learners must be given workplace responsibilities to enable them to meet the requirements of the units;
- customer perceptions of the RWE is similar to that found in the work situation being represented;
- learners must show that their productivity reflects those found in the work situation being represented

5.4 Simulation and witness testimony

Simulation or witness testimony is warranted where the centre can demonstrate that performance evidence has been impossible to obtain in the work environment.

5.4.1 Simulation

- Simulation can be applied to all Level 1 units.
- Evidence may be produced through simulation solely in exceptional circumstances. The exceptional circumstances, under which simulation is possible, are those situations that are not naturally or readily occurring, such as response to emergencies.
- If a unit or part of a unit at any level is simulated, it must be undertaken in a 'realistic working environment' (RWE). A RWE is "an environment which replicates the key characteristics in which the skill to be assessed is normally employed". The RWE must provide conditions the same as the normal day-to-day working environment, with a similar range of demands, pressures and requirements for cost-effective working. Guidelines for using RWE can be found in Appendix A.
- Units which have been imported by Instructus Skills into their apprenticeships or competence-based qualifications will be assessed in compliance with their relevant assessment strategies.

5.4.2 Witness testimony

Skillsfirst recognise the use of witness testimony and expert witness testimony as appropriate methods for assessors to collect evidence on candidate's performance.

Witness testimonies can be obtained from people that are occupationally competent and who may be familiar with the national occupational standards, such as the learner's line manager. They may also be obtained from people who are not occupationally competent and do not have a knowledge of the national occupational standards such as other people within the learner's workplace, customers and suppliers.

The assessor must judge the validity of the witness testimony and these may vary depending on the source. Witness testimonies can only support the assessment process and may remove or reduce the need to collect supplementary evidence. However, centres must comply with Skillsfirst guidance over the occupational competence and briefing of witnesses in the use of witness testimony.

5.5 Recognition of prior learning (RPL)

RPL is a method of assessment that considers whether a learner can demonstrate that they can meet the assessment requirements for a component of a qualification through knowledge, understanding or skills that they already possess and do not need to develop through a course of learning. Should any opportunities for RPL be identified, it is important that a complete process of recognising prior experience and learning is undertaken, by ensuring that:

- it covers relevant or appropriate experience for previous activities, as well as accredited learning and qualifications
- it is incorporated into the assessment planning, with details of how this will take place

- mapping of prior learning to the national occupational standards to identify gaps is documented and auditable
- assessment methods or processes for recognising prior experience and learning, are documented and made available to the external verifier
- the audit trail covers the whole process and methodology of RPL
- the authenticity and currency of presented evidence is established by the assessor

This evidence will need to be referenced clearly on recording documentation and will need to be appropriately authenticated and validated, perhaps by an employer or expert witness.

Assessment must be valid and reliable to ensure the integrity of the award. The evidence gathered must meet the standards of the qualification or component and the assessment process must be subject to the same quality assurance procedures as any other assessment process.

In summary, evidence submitted to the RPL process must:

- be authentic and prove conclusively that RPL is based on the learner's own work;
- meet the requirements of the current the skills and knowledge requirements and be appropriate to the content of the component or qualification being considered for RPL;
- be sufficient to conclusively prove consistency of learner performance in meeting the skills and knowledge requirements

6 Units

Unit Handbook

BUS38 – Understand employer organisations

Unit reference number: A/506/1964

Level: 2

Credit value: 4

Guided Learning (GL) hours: 40

Unit aim

Unit Handbook

IT201 – Bespoke software 2

Unit reference number: F/502/4396

Level: 2

Credit value: 3

Guided Learning (GL) hours: 20

Unit aim

This unit is about the skills and knowledge needed by an IT User to select and use a wide range of intermediate bespoke software tools and techniques for information that is at times non-routine or unfamiliar. Any aspect that is unfamiliar may require support and advice from others.

This is the ability to select and use a suitable bespoke software application to carry out an appropriate data processing task. It includes understanding the capabilities of the software and the types of tasks for which it is suitable, as well as the skills and techniques needed to use the software application appropriately and effectively.

Learning outcomes

There are three outcomes to this unit. The learner will:

LO1 Input and combine information using bespoke applications

LO2 Use appropriate structures to organise and retrieve information efficiently

LO3 Use the functions of the software effectively to process and present information

Unit content

Evidence requirements

Learners will be required to provide a portfolio of evidence indicating that they have met all the unit outcomes and assessment criteria.

Assessment guidance

Bespoke software tools and techniques will be defined as 'intermediate' because:

- the software tools and functions involved will at times be non-routine or unfamiliar;
- the choice and use of input, manipulation and output techniques will need to take account of a number of factors or elements and at times be multi-step;
- the user will take some responsibility for inputting, manipulating and outputting the information

Details of the relationship between the unit and relevant national occupational standards (if appropriate)
